

OMNIPI PLATFORM

Enterprise Strength AI. Built for Your Growth.

Create operational value with AI agents and automations you can trust — with the reliability, accuracy and security your organisation needs.

- ✓ Enterprise Grade Security
- ✓ Up to 95% Accuracy
- ✓ Significant Cost Savings

THE CHALLENGE

Consumer-Grade AI Solutions Are Costing You More Than You Know

Too many businesses are attempting to solve corporate problems with consumer-grade AI — and they're paying for it with failed projects, budget blowouts, and increased security exposure.

Your board wants to integrate AI, the business needs results, and the risk of getting it wrong sits squarely on your shoulders.

What you need is an enterprise-grade solution built for the job — one that is as serious about risk and compliance as you are.

CONSUMER AI VS. OMNIPI ENTERPRISE

Consumer AI Tools

- ✗ No compliance layer
- ✗ Vendor lock-in risk
- ✗ Security gaps
- ✗ No audit trail

OmniPi Enterprise

- ✓ Built-in compliance
- ✓ Model agnostic
- ✓ Enterprise security
- ✓ Full audit log

THE SOLUTION

OmniPi: The Enterprise-Level AI Platform

OmniPi is our proprietary AI platform engineered with enterprise-level risk management, compliance, security and guardrails already built in. Most companies hand you AI solutions and leave you to build the foundation underneath it. We don't. It's built into our system before we write a single line of code.

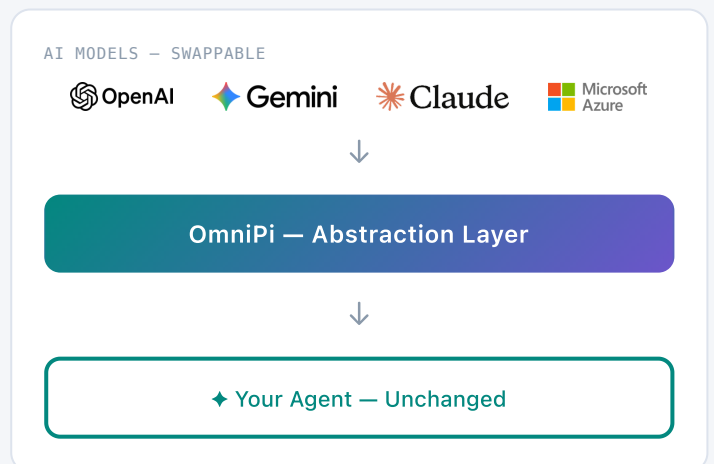

<p>01</p> <h3>Responsible AI Framework</h3> <p>Built to Australian and international responsible AI standards — ensuring every solution is transparent, auditable and operating within recognised ethical boundaries.</p>	<p>02</p> <h3>Model Agnostic</h3> <p>Not locked into a single AI provider. Select the best model from the full landscape of available LLMs — always built on the most capable technology for the job.</p>
<p>03</p> <h3>Enterprise-Level Security</h3> <p>Risk management, compliance and guardrails are built in. Your IT team won't need to close gaps or build workarounds.</p>	<p>04</p> <h3>Highly Controlled Access</h3> <p>Complete control over who can access sensitive information, training and results.</p>
<p>05</p> <h3>Australian Hosted</h3> <p>Hosted in Microsoft Azure's Australian data centres — your data never leaves the country.</p>	

MODEL AGNOSTIC

No need to rebuild your agents every time AI models change.

Every time your AI model gets an upgrade, or you find a model better suited to your business, you'd normally need to rebuild, test and verify your agents all over again.

OmniPi is model agnostic — meaning there's no need to rebuild your agents every time there is an update to ChatGPT, Gemini or Claude. Keeping you current, saving you time and money, and reducing transition risks.

You can finally have agents and automations confidently integrated into day-to-day operations — because OmniPi gives them the reliability, accuracy and consistency that enterprise demands.

OUR SERVICES

Enterprise-Level Applications

Delivering Real World Value

Purpose-built for speed, security and scale, every AlphaPi solution is designed to deliver measurable ROI from day one.

01

AI Compliance Agents

Reduce risk exposure with AI Compliance Agents that keep pace with your transaction volumes, stay current with legislative change and deliver up to 95% accuracy.

Built specifically for financial services, our agents work through a nine-step process from incident intake to final assessment — automatically and with a level of accuracy that consistently outperforms human review.

02

Intelligent Business Applications

Transform your organisation with AlphaPi's centralised Intelligent Business Applications platform.

Connect every system and information source into a single intelligent window. Then layer on AI agents and automated workflows to handle routine tasks, surface critical information and keep your operations running on autopilot.

03

AI-Powered Scenario Training

Build the resilience and capability your people need by exposing them to real-world scenarios without the real-world risk.

Our AI-powered scenario training replicates the most challenging interactions your people face, assessing both content and tone in real time. Each session adapts to the individual, closing skill gaps and developing the people skills that high-pressure roles demand.

OUR STORY

Australian Built. Enterprise Ready.

AlphaPi is an Australian technology company founded in 2022 by a team that believed organisations deserved better from AI.

We know organisations struggle to develop solutions that are reliable, robust, accurate, predictable and controllable. With increased scrutiny, the stakes are high and failure is not an option.

That's why we built OmniPi, a proprietary platform engineered from the ground up with everything a growing organisation needs already inside it. Because we believe that reliable, production-ready AI shouldn't be the exception. It should be the standard.

PARTNERSHIPS

Partnering with World Leaders in AI

AlphaPi collaborates extensively with leading researchers, technology providers and academic institutions to ensure our solutions are always built with the most current, validated and capable AI available.

GET STARTED

How to Get Started

01

Book a Demo

See OmniPi in action and talk through the problems you need to solve.

02

Design Your Solution

We'll create a solution tailored to your unique organisation and goals.

03

Deploy & Deliver

Go live with AI that's reliable, secure and delivers value from day one.
